

Whitepaper: SkullCard's Zero-Knowledge Proof

Version 2.0

May 14th, 2026

Mourning Dove

Version 2 of this whitepaper is still in progress and will explain in detail our Halo 2 KZG zero-knowledge proof implementation. The Halo 2 proof system is currently live in the **SkullCard** poker application and **open-sourced (GitHub)**. Benchmarks for both the Halo 2 and deprecated Circom solution are being prepared. **Version 1** of the whitepaper gives a conceptual overview of the motivation and implementation of zero-knowledge proofs in the SkullCard poker application.
